ABOUT ME

Computer Science student with hands-on experience building full-stack web applications, internal tools, and coding platforms. Comfortable working in Linux and across backend/frontend workflows, with a focus on clean architecture, testing, and practical product delivery.

SKILLS

Languages: C++, Java, Python, JavaScript, TypeScript, Go

Frameworks & Data: React, Next.js, NestJS, Vite, PostgreSQL, Supabase

Tools & Platforms: Linux, Docker, Git, Nix, Cloudflare Workers

Spoken Languages: Vietnamese (Native), English (Working proficiency)

EXPERIENCE

Full Stack Developer (Contract)

Hanoi

BAP IT Co., JSC

Feb 2026 - Present

- Contributed to an internal online coding/interview platform, implementing staff-facing dashboard workflows, authentication, question bank management, and session management features.
- Built JWT-based auth flows, role-based access control, candidate invite lifecycle, and execution-related backend/frontend surfaces.
- Integrated Judge0-based multi-language code execution, prototyped real-time collaboration with Yjs/WebSocket, and set up testing infrastructure with Jest and Playwright.
- Built development tooling and CI workflows, including a Codeforces Parquet importer to bulk-seed the question bank.
- Contributed to flow analysis and feature implementation for client demo applications in healthcare and enterprise workflow domains.

PRODUCTS & PROJECTS

Ngàn Lá

2025 - 2026

nganla.com — Online exam platform for Vietnamese high school students with textbook mapping and analytics.

- Built with Next.js, Go (Chi) backend, and shadcn/ui; structured content by grade, subject, and textbook chapter.
- Developed automated content crawlers and an LLM-assisted workflow to generate and bulk-import exam questions.
- Implemented SePay QR payment flow with API/webhook-based payment confirmation.

Vocaxis

2025

thangqt.com/projects/vocaxis — Vocabulary learning platform with AI-generated entries, multi-language translations, and FSRS spaced repetition.

- Built a StarDict-compatible dictionary loadable into Kindle and GoldenDict, served via Cloudflare Workers/D1.
- Created a Plasmo browser extension for context-aware vocabulary capture from any webpage.
- Publicly launched on Next.js/Supabase and reached 400 user signups organically.

EDUCATION

VNU University of Engineering and Technology, Hanoi

2023 - 2027

Computer Science
